

Accessing Your Trading Account via MT5

How to view your own trading account in read-only mode using MetaTrader 5.

This guide explains how to access your trading account through the MetaTrader 5 (MT5) app. Please note you may have more than one trading account, and all of them can live within the same MT5 app. You will need to enter your credentials for each trading account one at a time, as every account has its own unique account number and password.

FINDING YOUR SERVER Search **Aeron** in the business name section of MT5 to find **AeronLimited-Server**.

STEP 1 — Download MetaTrader 5

Make sure you download MetaTrader 5 (MT5), not MT4.

- **On your phone:** download the MetaTrader 5 app from the Apple App Store (iOS) or the Google Play / Android store.
- **On your computer:** you must use the broker-licensed version of MT5. Download it here: drive.google.com/file/d/1ox0e9aGb6EBMp5T7EXm6h8W5Kggb98f/view

STEP 2 — Log in on desktop (Windows / Mac)

- Open the MT5 platform and click File in the top-left corner.
- Select Login to Trade Account.
- Enter your Login ID (the account number).
- Enter your Investor Password in the password field.
- Select the correct Server assigned by your broker (AeronLimited-Server).
- Click OK.

STEP 3 — Log in on mobile (iOS & Android)

- Open the MetaTrader 5 app and go to the Settings or Accounts menu.
- Tap the + (plus) icon to add a new account.
- Search for and select your broker — search Aeron to find AeronLimited-Server.
- Type your Login ID (account number) and the Investor Password.
- Ensure you select the exact Server (e.g. Live or Demo) associated with your account.
- Tap Login or Save.

STEP 4 — Confirm you're connected

You'll know the login was successful when you see the word "investor" or "(read only)" displayed in the MT5 status bar. That confirms you're viewing safely in read-only mode.

Good to Know

- **Read-only is intentional.** Because you're using the Investor Password, you can't accidentally interfere with the copier. The VIP Copier does the trading — you simply watch.
- **Don't place manual trades or change settings on this account,** as it can disrupt the copier (the Investor Password prevents this, which is exactly why we recommend it).
- **Short-term ups and downs are normal.** Open profit and loss will move minute to minute; performance is measured over time, so try not to read too much into brief swings.
- **Keep your credentials private.** Treat your passwords like banking details. We will never ask you for your Master Password.
